---

The construction of a 22.75 MW solar energy project ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

With Afghanistan's electricity access rate hovering at just 34%, the Kabul 50 MW photovoltaic installation isn't just about clean energy - it's about powering hospitals, schools, and small ...

Inauguration of 22.75 (MW) Solar Power implementation in Kabul! This ambitious investment project represents a significant step forward in our commitment to sustainable energy and...

Since regaining power in August 2021, the Islamic Emirate has undertaken substantial initiatives in various sectors to boost development in the country, including the ...

The compact and transportable format of this ISO OFF-GRID container ensures a real "plug and play" for a safe energy supply. The unit integrates power electronics developed by our ...

The construction of a 22.75 MW solar energy project began today (Tuesday) in the Naghlu area of Surobi district, Kabul.

According to the Sasaki design frame-work, three types of rooftop solar solutions are suggested for Kabul. Rooftop solar hot water is very common in many cities all over the world.

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

Inauguration of 22.75 (MW) Solar Power implementation in Kabul! This ambitious investment project represents a significant step forward in our ...

Afghanistan""s capital, Kabul, faces persistent energy shortages due to rapid urbanization and limited grid infrastructure. The Kabul large-scale energy storage project aims to address these ...

With over 300 sunny days annually, Kabul""s solar potential remains largely untapped. As Afghanistan""s capital faces frequent power shortages and rising electricity costs, photovoltaic ...
