How did Kosovo get its own energy system?

Kosovo was part of the Regional Energy Community and was connected with the regional system through interconnections with Serbia, North Macedonia, Montenegro and Albania. KOSTT made an agreement with ENTSO-Eso Kosovo gets his own independent region of energy administration. Kosovo gets full independence and control of its energy industry.

How can Kosovo improve its energy sector?

The Government of Kosovo aims to put its energy sector on a sustainable path, through developing renewable energy potential, improving energy efficiency, closing a 50-year-old power plant, and rehabilitating another old power plant.

What is the largest wind farm in Kosovo?

Kitka Wind Farm is the first wind plant in Kosovo with 9 General Electric 3.6 MW turbines and it has a installed capacity of 32.4 MW. The 102.6 MW wind farm in Bajgorais the largest in Kosovo so far. The wind farm consists of 27 turbines supplied by General Electric.

The project has been operational since the first quarter of 2022, and is the largest of its kind in Kosovo, utilizing 27 turbines from General Electric. The wind farm supplies electricity ...

Battery Energy Storage Systems (BESS): Implement BESS with a total capacity of 170 MW/340 MWh to support grid stability and integrate energy sources. Future Preparedness: Prepare for ...

GE Vernova announced it has signed an agreement to supply, service, and commission 12 of its 6.1 MW-158m onshore wind turbines for ...

Explore the 22% surge in Kosovo's solar and wind energy projects. Learn how international collaboration,

particularly from Germany, is driving this sustainable transformation.

The objective of the Battery Energy Storage System (BESS) project is to support Kosovo's energy security and transition to a cleaner energy future through usage of energy storage systems for ...

The 200MWh Flagship Project: Backed by the U.S. Millennium Challenge Corporation, this 150MW/200MWh battery system acts like a "energy shock absorber" for ...

The deal, which was booked in the first quarter of 2025, will enable both companies to support Kosovo in its goal of adding significantly more renewable energy by 2030.

The proposed hybrid of solar-wind system coupled with battery storage, to make up for the 10 years of losses to our energy system, has the potential to lead the transformation ...

GE Vernova announced it has signed an agreement to supply, service, and commission 12 of its 6.1 MW-158m onshore wind turbines for Çalik Renewables's Zatriq I & II ...

The project has been operational since the first quarter of 2022, and is the largest of its kind in Kosovo, ...

Explore the 22% surge in Kosovo's solar and wind energy projects. Learn how international collaboration, particularly from Germany, ...

USAID Energy Sustainability Activity aims to improve Kosovo's energy security by strengthening the capacity and sustainability of local institutions to advance energy market development and ...

Renewables plus battery storage: The launch last year of Kosovo's first large-scale wind and solar power projects revealed the first performance data for such projects.
