Lithium is used to treat the manic episodes of manic depression - hyperactivity, rushed speech, poor judgment and aggression. Learn about side effects, interactions and ...

Lithium, a versatile alkali metal, has captured global attention thanks to its remarkable properties and wide-ranging applications. From being the lightest metal to powering our electronic ...

Signs of lithium toxicity include severe nausea and vomiting, severe hand tremors, confusion, vision changes, and unsteadiness while standing or walking. These symptoms need to be ...

Lithium is used to treat and prevent episodes of mania (frenzied, abnormally excited mood) in people with bipolar disorder (manic-depressive disorder; a disease that causes episodes of ...

lithium (Li), chemical element of Group 1 (Ia) in the periodic table, the alkali metal group, lightest of the solid elements. The metal itself--which is soft, white, and lustrous--and ...

Learn more about Lithium uses, effectiveness, possible side effects, interactions, dosage, user ratings and products that contain Lithium.

Lithium is used to treat mania that is part of bipolar disorder (manic-depressive illness). It is also used on a daily basis to reduce the frequency and severity of manic episodes.

Most lithium is mined as rock minerals in Australia, while significant quantities are also produced from salars in Chile, Argentina and China. Lithium is produced from industrial ...

Most lithium is currently produced in Chile, from brines that yield lithium carbonate when treated with

sodium carbonate. The metal is produced by the electrolysis of molten lithium chloride ...

Lithium (from Ancient Greek: λίθος, līthos, "stone") is a chemical element; it has symbol Li and atomic number 3. It is a soft, silvery-white alkali metal. Under standard conditions, it is the ...
