What is the future of the Marshall Islands electricity system?

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it depends on our people. Take a look at where we are headed.

How will the Marshall Islands achieve a low-carbon energy future?

trated by our adoption of a pathway to a low-carbon energy future. In our Nationally Determined Contribution, the Republic of the Marshall Islands has committed to reducing GHG emissions to achieve net zero emissions by 2050, with two significant milestones along the way - by 2025 our emissions will be a

Will solar power work in the Marshall Islands?

n approaches may work better than others for the Marshall Islands. Grids are based on centrally planned and controlled generation, therefore household-scale solar will not be allowed to feed into the grid. A 'soft' appro

Which technology pathways are suitable for solar PV generation in the Marshall Islands?

ut of the technology pathways, in particular for Majuro and Ebeye es are devised specifically for the context of Solar PV generation in the Marshall Islands. It will be helpful for RMI stakeholders and development partners to have a shared view of the issues and why certa

Marshall Islands - Owner's Engineer for Floating Solar, BESS and Power Station refurbishment. ITP is engaged as Owner's Engineer for a hybrid energy project in Majuro, ...

The framework used for developing the national energy policy constitutes of five specific areas to shift toward more sustainable energy development and use in the Marshall Islands: o ...
