**How does Mexico regulate energy storage systems?**

The Mexican government recently issued general guidanceto regulate energy storage systems. These rules outline the process and rules for integrating storage systems with different types of facilities,including power plants,behind-the-meter installations,load centers and distributed generation projects.

**How can Mexico promote energy storage?**

To accelerate investments and promote the formation of a storage market,Mexico should introduce technology-push and market-pull policies simultaneously. Procurement targets could be used if policymakers decided that energy storage is a short-term priority,as in the case of the US.

**How much does Mexico spend on RD&D?**

Although RD&D has indeed been a crucial policy in the US and Germany,Mexico's annual RD&D budgets are significantly lower. In 2018,Mexico spent only \$0.4 billionin energy-related RD&D,while Germany and the US spent \$1 billion and \$7 billion,respectively .

**Why did Mexico introduce a new interconnection policy in May 2020?**

In May 2020,the Mexican government introduced a policy that,under the pretext of grid reliability,sought to grant interconnection priority to CFE's strategic projects,impose stricter requirements for renewable energy projects to obtain generating permits, and require payments for additional ancillary services to offset intermittency.

Energy storage regulations that have taken effect in Mexico are designed to support the country's renewable ambitions.

The administrative provisions regulating the integration of EES into the National Electric System are in effect as of Monday. The incorporation of 8,412 MW of energy storage ...

Even though energy storage technologies are one of the many solutions to add grid flexibility, they have not yet been implemented in Mexico and their consideration in new energy ...

The administrative provisions regulating the integration of EES into the National Electric System are in effect as of Monday. The ...

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must ...

According to the Power Sector Development Plan 2025-2039, Mexico will add 19,954 MW of renewable energy and 5,000 MW of energy storage by 2030. Solar PV will ...

These rules outline the process and rules for integrating storage systems with different types of facilities, including power plants, behind-the-meter installations, load centers ...

On March 18, 2025, President Claudia Sheinbaum enacted a sweeping energy reform package that restructures Mexico's power sector in favor of state-owned companies.

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems ...

The Storage Regulations contain rules on the applicability of interconnection and connection studies; the possible offers for the purchase and sale of electricity, capacity, and ...

After years of stop-and-go drafts, Mexico's Energy Regulatory Commission (CRE) finally published Resolution A/113/2024 in the Diario Oficial de la Federaci&#243;n on March 7, 2025.

Mexico has taken a bold step in reshaping its renewable energy sector by mandating that all new wind and solar projects include ...

Mexico has taken a bold step in reshaping its renewable energy sector by mandating that all new wind and solar projects include battery storage equal to 30% of their ...
