Co-located with the extremely well renowned Middle East Energy Show, join us for the inaugural Energy Storage Middle East Summit in Dubai, April 2026, as we bring our world ...

The non-profit group Global Energy Monitor reports specific states within the area have set targets for a fivefold increase in wind and solar by 2030. There are planned wind and ...

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

In 2025, the Middle East is rapidly rewriting its energy narrative. Once defined by oil exports and fossil-fuel dependency, the ...

Masdar and Saudi Arabia's ACWA Power have invested in several solar and wind projects across the Middle East and North Africa, helping to drive the region's energy transition ...

As September 2025 draws to a close, the Middle East's renewable energy storage sector is charging ahead with groundbreaking announcements, financial closes, and ...

Looking at historical data, project pipelines and numerous (often highly optimistic) announcements of future plans and targets, large differences among countries are observed, indicating that the ...

We highlight the rise of standalone projects against hybrid solar-plus-storage systems, emerging government tenders, and key initiatives like the Red Sea Project and the ...
