In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the ...

Located in Omaburu, Erongo Province, northern Namibia, the project aims to address the demand for power shortages, reduce the impact of unstable photovoltaic power ...

One of the most important inputs for economic growth is an abundance of reliable, affordable energy and Namibia is increasingly coming under pressure to deliver a power supply that ...

Once operational, the Omburu BESS will allow NamPower to manage energy supply and demand more effectively. The system will perform energy arbitrage, displace costly ...

The Omburu Energy Storage Project is located in central northern Namibia, with a designed storage capacity of 51 megawatt hours. It can release electricity to the grid during ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power

Pool (SAPP) can be stored in the BESS. The stored energy could supply ...

NamPower will contribute approx. 100 million NAD to ensure the total project cost of around 500 m NAD are fully covered. The BESS plant will assist in peak shifting, energy arbitrage, ...

NamPower will contribute approx. 100 million NAD to ensure the total project cost of around 500 m NAD are fully covered. The BESS plant will assist in ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't ...
