-----

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the ...

Peak Energy, a Denver-based battery manufacturer, announced today the launch of the first grid-scale sodium-ion pyrophosphate (NFPP) battery system in the United States, ...

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be ...

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center ...

A manufacturing engineer prepares a battery storage submodule for lifting at Peak Energy's plant in California. Peak Energy

Meet the peak-valley battery energy storage system - the Swiss Army knife of modern power management. As electricity prices swing wildly between peak and off-peak ...

Peak Energy announced on Friday the successful deployment and operation of the first grid-scale sodium-ion battery system in the US. First unveiled in July, Peak Energy's ...

Peak Energy's solution is the first battery energy storage system to remove nearly all moving parts with new patent-pending technology, driving significant cost-savings.

Because sodium ion and lithium ion batteries are so different, Dales said that he expects Peak's launch to usher in an era of varying in battery solutions for a diversity of energy ...

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be deployed in a shared pilot with nine ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable ...

Peak Energy, a US-based company developing low-cost, giga-scale energy storage technology for the grid, has announced the launch and shipment of its sodium-ion battery ...
