Two battery companies are joining forces with a plan to deploy energy storage systems in the US that rely on sodium-ion technology.

The U.S. Department of Energy (DOE) has awarded \$50 million over the next five years to establish the Low-cost Earth-abundant ...

The Baochi Energy Storage Station that just opened in Yunnan province, China, is a hybrid system that uses both lithium-ion and ...

The U.S. Department of Energy (DOE) has awarded \$50 million over the next five years to establish the Low-cost Earth-abundant Na-ion Storage (LENS) consortium.

A new sodium-ion battery offers a cheaper and safer alternative to conventional lithium-ion systems, scientists say, paving the way for more sustainable EVs.

Peak Energy Delivers First Grid-Scale, Sodium-Ion Battery Storage System in the US. Peak Energy's solution is the first battery energy storage system to remove nearly all ...

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the ...

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center ...

Project aims to develop safer, low-cost solid-state sodium batteries for a more resilient, reliable energy grid. Over the next decade, global energy demand is expected to ...

Two battery companies are joining forces with a plan to deploy energy storage systems in the US that rely on sodium-ion ...

A new class of solid-state sodium-ion batteries could reshape the future of electric vehicles and renewable energy storage that may replace the dominant lithium batteries and solve several ...

The Baochi Energy Storage Station that just opened in Yunnan province, China, is a hybrid system that uses both lithium-ion and sodium-ion batteries and has a capacity of 400 ...

The US startup Alsym Energy is launching its new "salt battery" sodium-ion energy storage formula into the global market.

While sodium-ion batteries have lower energy density than lithium-ion batteries, they provide a sustainable and cost-effective energy storage solution for specific applications ...
