With this project, we can increase production, reservoir capacity, and efficiency from our facilities in Fortun while taking better ...

Ever wondered how a city known for fjords and northern lights is quietly becoming a global energy storage pioneer? The Oslo Grid Energy Storage Project is rewriting the rules ...

Located in Norway, Northern Lights is the world's first CO₂ transport and storage project open to industry, owned equally by TotalEnergies, Equinor and Shell. Operational ...

Norsk Hydro has approved the construction of the Illvatn pumped-storage project in Luster, western Norway, the company's largest hydropower development in more than 20 ...

Located in Norway, Northern Lights is the world's first CO₂ transport and storage project open to industry, owned equally by ...

The project's importance, operational framework, difficulties encountered during development, and potential to influence industrial decarbonization in the future are all covered ...

Energy Transition Norway's research and development (R& D) projects focus on renewable energy, carbon capture and storage (CCS), enhanced oil ...

Energy Transition Norway's research and development (R& D) projects focus on renewable energy, carbon capture and storage (CCS), enhanced oil recovery, and decommissioning.

In April 2020, the Norwegian Ministry of Energy granted Norsk Hydro a concession to develop the Illvatn pumped storage power ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial ...

With this project, we can increase production, reservoir capacity, and efficiency from our facilities in Fortun while taking better care of water resources with a minimal ...

The project's importance, operational framework, difficulties encountered during development, and potential to influence industrial ...

While Norway boasts a robust renewable energy sector dominated by hydropower, large-scale dedicated energy storage facilities ...

In April 2020, the Norwegian Ministry of Energy granted Norsk Hydro a concession to develop the Illvatn pumped storage power plant. An application for a plan change is being ...

While Norway boasts a robust renewable energy sector dominated by hydropower, large-scale dedicated energy storage facilities are still in their early stages of development.

Scheduled for completion in 2026, the projects will have a combined storage capacity of nearly 40 MWh, making them among the largest battery projects in Norway to date, ...
