As part of a research project, Norwegian electricity supplier Arva is investigating how battery storage can improve the quality of electricity supplies and safeguard it in the event ...

In a groundbreaking advance for renewable energy, researchers from Norway and Germany have developed a pioneering ...

Northern Lights will be the first cross-border value chain project along the Norwegian coast, to offer a carbon storage solution to European industrial companies. This ...

Norway has opened the gateway to a massive undersea vault for carbon dioxide, marking a significant step towards launching what its operator calls the first commercial ...

Norway has launched the world's largest full-scale operation of industrial carbon capture and storage, ploughing billions of dollars of ...

The aim of this work is to investigate the potential for decarbonizing remote islands in Norway by installing RES-based energy systems with hydrogen-battery storage.

In a newly awarded project, researchers funded by the U.S. Department of Energy are partnering with European scientists to track injected carbon dioxide in the world's first and ...

An exploratory well for the Havstjerne CO₂ storage project offshore Norway in the North Sea has confirmed a reservoir suitable for injection and storage of carbon dioxide. The ...

Norway has opened the gateway to a massive undersea vault for carbon dioxide, marking a significant step towards launching what its ...

Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the deep sea to deliver electricity on demand. This ...

In a groundbreaking advance for renewable energy, researchers from Norway and Germany have developed a pioneering underwater energy storage system that turns ocean ...

Northern Lights will be the first cross-border value chain project along the Norwegian coast, to offer a carbon storage solution to ...

Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the ...

Harbour Energy PLC has found a suitable reservoir for carbon dioxide (CO₂) injection on Norway's side of the North Sea about 30 kilometers (18.64 miles) southeast of the ...

Norway has launched the world's largest full-scale operation of industrial carbon capture and storage, ploughing billions of dollars of subsidies into the venture to trap the ...
