How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How much does SA 5G cost?

However, transitioning from non-standalone (NSA) 5G to SA 5G comes with a hefty price tag--between \$1 billion and \$3 billion per operator. Unlike NSA 5G, which relies on existing 4G infrastructure, SA 5G requires a brand-new core network. This includes cloud-based architecture, advanced data centers, and software-defined networking.

How much does 5G backhaul cost?

Satellite-based 5G backhaul can cost up to \$500 per Mbps, significantly higher than fiber. In remote and rural areas where fiber optic deployment is too costly, satellite-based 5G backhaul is an alternative solution. However, it comes at a steep price, with costs reaching up to \$500 per Mbps, much higher than fiber-based solutions.

How much does NSA 5G cost?

Standalone 5G (SA 5G) is the ultimate version of the technology, offering ultra-low latency and full network slicing capabilities. However, transitioning from non-standalone (NSA) 5G to SA 5G comes with a hefty price tag--between \$1 billion and \$3 billion per operator.
