BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, ...

In West Ottawa, a proposed energy project will address Ontario's growing need for electricity and promises to stabilize the province's energy grid, preventing potential blackouts.

Facilities that successfully demonstrate their capabilities will be contracted by mid-2024, with operations starting on or before May 1, 2028. The Ottawa ...

Professor Schell was interviewed by Stu Mills of CBC Ottawa to explain the need for battery energy storage systems in the Ontario ...

According to Ottawa, the province regulates electricity generation supplies but municipalities have authority over new proposed renewable energy generation and storage ...

Professor Schell was interviewed by Stu Mills of CBC Ottawa to explain the need for battery energy storage systems in the Ontario power grid, and particularly in Ottawa.

Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year. Ottawa is looking at regulatory changes around these types of facilities.

A city committee has passed new regulations establishing land use policy for companies looking to build battery energy storage systems (BESS) in Ottawa.

Water storage may be available on-site, and Ottawa Fire Services is Superior Tanker Shuttle certified to maintain continuous water delivery as needed. Will Ottawa Fire ...

A city committee has passed new regulations establishing land use policy for companies looking to build battery energy storage ...

Facilities that successfully demonstrate their capabilities will be contracted by mid-2024, with operations starting on or before May 1, 2028. The Ottawa BESS 2 Project, among other ...

According to Ottawa, the province regulates electricity generation supplies but municipalities have authority over new proposed ...

BESS are an emerging battery technology that can help make the electricity system more reliable by drawing and storing energy from the grid during off-peak hours, when ...

The project can store 250 MW of electricity, making it the largest battery energy storage system proposed in the Ottawa area so far. A 250 MW battery can supply enough ...

Workers check battery storage pods at a lithium-ion battery storage ...

Water storage may be available on-site, and Ottawa Fire Services is Superior Tanker Shuttle certified to maintain continuous water ...
