This power station is the first grid-connected solar project developed by an IPP in Burundi. It is also the first major electricity generation investment in the country, in the past 30 years.

This Burundi Solar Production Report provides comprehensive insights into the statistics and developments of the solar energy industry in Burundi.

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The ...

Locally produced electricity, although not a perfect substitute for fossil fuels especially in Burundi, could still alleviate the energy poverty affecting the country, according to ...

The pioneering 7.5 MW solar PV plant has increased Burundi's generation capacity by over 10%, and is the country's first substantial energy generation project to go online in over three ...

Built through a multinational effort, the pioneering 7.5 MW solar PV plant near the village of Mubuga has been in operation since May 2021 and now provides over 10% of Burundi's ...

Locally produced electricity, although not a perfect substitute for fossil fuels especially in Burundi, could still alleviate the energy poverty ...

Burundi's first solar PV power plant has reached commercial operation. Located in Mubuga in the Gitega Province, the project - which is the ...

Renewables such as solar panels, wind turbines and hydroelectric dams generate electricity without burning
