The plant will have a solar photovoltaic capacity of 125 MW and a battery-based power storage system of up to 55MW/220 MWh. The ...

Whether for commercial & industrial or large-scale front of the meter projects, we offer integrated solutions for solar power, battery energy storage systems (BESS), energy management ...

The Australian Capital Territory Government and global energy storage firm Eku Energy have begun construction on the Williamsdale Battery Energy Storage System

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project enhances energy security and reliability, ...

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal ...

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project ...

Composed of Megapacks supplied by Tesla Energy, the Williamsdale BESS will be able to power approximately one-third of Canberra for two hours during high-demand periods. In partnership ...

Global energy storage specialist Eku Energy has announced reaching financial close for its Williamsdale Battery Energy Storage System (BESS) located in the Australian ...

Global energy storage leader Eku Energy today announced it has achieved Financial Close for the

Williamsdale Battery Energy Storage System (BESS), a significant ...

Unlock the potential of battery energy storage systems for quality solar systems in Canberra, enabling energy independence and cost savings.

The plant will have a solar photovoltaic capacity of 125 MW and a battery-based power storage system of up to 55MW/220 MWh. The company acquired the project from Sun ...

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of ...
