In the spring of 2025, Ukraine's energy sector finds itself at a crossroads. Underneath the constant hum of reconstruction and the lingering threat of war, a quiet ...

Ukrainian private energy group DTEK plans to install a series of energy storage systems across Ukraine with a total capacity of 200 MW, investing EUR 140 million (USD 154.6m) in the project.

During the online discussion, the participants identified the main priority problems for the development of the energy storage market in Ukraine. They relate to military risks, ...

Meeting these requirements would call for at least 0.8 GWh of energy storage systems with a total capacity of 2 GWh, paired effectively to optimise renewable energy sources (National Energy ...

During the discussion, the following issues were considered: the existing legislative framework of ESS, international practices of ESS implementation and recommendations for ...

A report by the International Energy Agency (IEA) recommends three strategies to accelerate the deployment of distributed solar and battery energy storage systems (BESS) in ...

Below, we explore what types of storage systems Ukrainians need most, the shortcomings of existing options, and why developing this sector in alternative energy is crucial.

Ukraine's energy sector faces exceptional circumstances that significantly influence photovoltaic storage system requirements. The ongoing conflict has damaged critical ...

During the discussion, the following issues were considered: the existing legislative framework of ESS,
