Riga's municipal code now mandates 2-hour storage capacity for all new solar installations over 50kW. This forward-thinking regulation created a 170% surge in local storage deployments ...

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable ...

Summary: The Riga battery energy storage project represents a critical step in advancing renewable energy integration and grid stability in the Baltic region. This article explores the ...

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, next to the existing wind park.

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge [8]. This isn't just about keeping smartphones charged; it's about rewriting Europe's ...

The green energy project has been launched by the port company "Riga Universal Terminal" (RUT), where a solar panel park with a planned capacity of 250 kW is being ...

It adopts high-safety lithium iron phosphate batteries and is equipped with the province's first integrated system of "new energy + energy storage + digital management and control", with a ...

Backed by BlackRock's Diversified Infrastructure business, Jupiter Power has a strategic and established portfolio of utility-scale energy storage projects operating or in construction in the ...

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the

installation of solar panels, the ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Using a solar collector field together with a short-term heat storage system can achieve Solar Fraction (SF) 10-20 % of the total system energy balance, which is an effective solution to ...
