Who buys electricity in Senegal?

Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel. The rest is mostly coal and hydroelectricity.

How is electricity generated in Senegal?

Electricity generation, mainly on a build-own-operate (BOO) basis, is open to the private sector. Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel.

Who produces energy in Senegal?

Energy is produced by private operators and sold to the Senelec energy corporation. According to a 2020 report by the International Energy Agency, Senegal had nearly 70% of the country connected to the national grid. Current government strategies for electrification include investments in off-grid solar and connection to the grid.

Can Senegal switch from diesel to coal?

Senegal is committed to shifting from a diesel-based power generation to cheaper energy sources. Senegal has thus put an option on the coal technology. The recent bid to build-own and operate a 125 MW coal-fired Sendou power station was awarded to a consortium of companies headed by the Swedish operator Nykomb Synergetics.

GreenYellow is continuing to withdraw from Africa. The French company has just sold its assets in Senegal to Afreenergy, an energy company based in Mauritius.
