-----

As a floating solar PV project, it also offers an innovative solution to the land constraints faced by island nations like Seychelles, ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the largest in Africa.

As a floating solar PV project, it also offers an innovative solution to the land constraints faced by island nations like Seychelles, unlocking clean energy generation without ...

Recognised as a flagship project in the country's national renewable energy roadmap, the facility is designed to generate clean electricity on water surfaces rather than on ...

Once completed, Seychelles will have built the world's largest salt-water floating solar plant. The project, which has been seven years in the making, will see the installation of ...

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new ...

Recognised as a flagship project in the country's national renewable energy roadmap, the facility is designed to generate clean ...

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

To date, affordable and effective solar and battery storage systems have opened up new possibilities for the archipelago, particularly in its high-end tourism sector.

To date, affordable and effective solar and battery storage systems have opened up new possibilities for the archipelago, particularly ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the ...

In a landmark move for renewable energy in the Indian Ocean, Qair International has officially commenced construction on the first floating solar power plant in the Seychelles.
