With photovoltaic (PV) systems now costing 80% less than a decade ago, solar + storage solutions are rewriting the rules. Let's explore how this tropical nation is cutting energy costs ...

To date, affordable and effective solar and battery storage systems have opened up new possibilities for the archipelago, particularly ...

Qair is implementing the project in partnership with local renewable energy firm Vetiver Tech. A first in Seychelles and a regionally significant project. This floating solar power plant is the first ...

The much-anticipated 5MW Floating Independent Power Producer (IPP) Photovoltaic (PV) project in the Providence Lagoon is poised to commence in the coming ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the ...

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the largest in Africa.

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new ...

To date, affordable and effective solar and battery storage systems have opened up new possibilities for the archipelago, particularly in its high-end tourism sector.

In a landmark move for renewable energy in the Indian Ocean, Qair International has officially commenced construction on the first floating solar power plant in the Seychelles.

Key Figures & Findings: Seychelles has begun construction of its first utility-scale floating solar power plant, a 5.8 MW project in the Providence Lagoon on Mahé Island.
