Is Europe ready for port modernization?

While China has been considered a pioneer in the automation of container terminals for a long time, Europe has picked up the pace in terms of port modernization in recent years. All ports should aim for more automated and digitalized processes if they don't want to be left behind in international comparison.

How are containers stored in the Terminal Altenwerder?

Optimized container storage: The 26 storage blocks in the Terminal Altenwerder are each handled in parallel by two gantry cranes on rails- they substitute for each other when maintenance is required. Towing vehicles transport the containers between the storage blocks and the railway station and ensure a smooth process.

Are automated ports the future of container shipping?

Automated ports are already an integral part of container shipping today and you might have touchpoints with automated processes in your daily business as well. Thanks to modernization, Hapag-Lloyd can guarantee faster transportation, greater safety and fewer damaged goods - benefiting every involved party.

Could a seafold 40' container slash the cost of repositioning empty containers?

More than a fifth of containers are returned empty to their port of origin empty, according to estimates. CCS claims that the SeaFold 40' box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon emissions by 70%.

"Whether it is saving cost or space, our containers create a safe and more efficient operating and storage system at a port, terminal ...

The company operates in the port of Salerno, one of the main port hubs in southern Italy. It carries out services for both container and RoRo vessels, ...
