I'm trying to write a script that will calculate a directory size and if the size is less than 10GB, and greater then 2GB do some action. Where do I need to mention my folder name? # 10GB SIZE="

As you know, matlab deals mainly with matrices. So, the size function gives you the dimension of a matrix depending on how you use it. For example: 1. If you say size(A), it will give you a ...

What is the command to find the size of all the databases? I am able to find the size of a specific database by using following command: select ...

What is the difference between .size() and .length ? Is .size() only for arraylists and .length only for arrays?

Is there any way to check file size before uploading it using JavaScript?

In this case, depending upon what your use case is, you might be better off using int (or long long) for s1 and s2. There are some functions in C/POSIX that could/should use size_t, but don't ...

In several C++ examples I see a use of the type size_t where I would have used a simple int. What's the difference, and why size_t should be better?

The OP was asking "Array.size () vs Array.length". From the previous discussions, it was make clear, that the "size" Function is not part of standard JavaScript but implemented ...

The approach basically builds on other work where people experimentally identified the size of primitives and typical Java objects and then apply that knowledge to a ...

If the size of the int is that important one can use int16_t, int32_t and int64_t (need the iostream include for

that if I remember correctly). What's nice about this that int64_t should not have ...
