Our standard contracts and securitization resources include example contracts, operation and maintenance guides, and a mock filing with ratings agencies for photovoltaic ...

"Assignment and Assumption Agreement" means the Assignment and Assumption Agreement, substantially in the form of Exhibit E-1, to be executed and delivered by Seller and Buyer at the ...

A spate of build-transfer transactions -- where the utility hires a third-party project developer to develop and construct a project, then transfers ownership to the utility at completion -- is ...

Solar + storage: A project with co-located solar panels and battery storage, with the solar electricity output able to charge the battery system. Including storage may increase the ...

Under this transactional arrangement, a third party develops and constructs a renewable energy project and transfers it to the utility at a negotiated development or completion phase.

Dramatic reductions in the installed cost of solar panels, improved efficiencies, and the looming expiration of federal tax benefits have led to a new openness to utility-owned generation.

The long term nature of these agreements allows PPAs to be transferred with the property and thus provides customers a means to invest in their home at little or no cost.

This CLE course will provide energy counsel with an in-depth analysis of build-transfer agreements (BTAs) for renewable energy projects.

This course teaches the fundamentals of crafting a renewable energy build-transfer agreement between utilities
