---

Explore market trends, pricing, and applications for solar energy storage containers through 2025. Learn about key cost drivers, technological advancements, and practical uses in ...

Record-Breaking Storage Growth: Battery storage capacity surpassed 30 GW nationwide, representing a 65% increase year-over-year, with Q1 2025 setting a new first-quarter record at ...

There are currently no complete domestic manufacturers of cells, modules and containers, but there will be two complete domestic battery suppliers by the second half of 2025.

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, driving global energy storage system shipments to ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

The United States installed 7.4 GW of utility-scale solar, wind and energy storage in the first quarter of 2025, falling just short of the ...

The United States installed 7.4 GW of utility-scale solar, wind and energy storage in the first quarter of 2025, falling just short of the record 8.1 GW installed in the first quarter of...

Renewables accounted for over 90% of new capacity additions in 2024, led by growth in solar and battery storage. Our analysis of the project pipeline points to continued growth in 2025. We ...

Explore market trends, pricing, and applications for solar energy storage containers through 2025. Learn about key cost drivers, ...

As of Q1 2025, the Clean Investment Monitor tracked 123 operating battery manufacturing projects in the US with the capacity to ...

As of Q1 2025, the Clean Investment Monitor tracked 123 operating battery manufacturing projects in the US with the capacity to manufacture about 202 gigawatt hours ...
