What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarfold photovoltaic container?

at full power. The solarfold Photovoltaic Container is mobile for universal deployment with a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into its operating position rapidly and smoothly along a length of around 123 metres.

Can You Power a container with solar power?

You have a container. Let's power it with carbon-free, cost-efficient, plug-and-play, electricity. We are experts in solar energy. Our patent protected solar power units fit perfectly on top of 20' or 40' containers. No more hassle to get cost-efficient, green, energy to your containers. Containers are used for many purposes.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

V&#229;r Solar Container f&#246;r n&#228;rvarande den st&#246;rsta mobila solkraftsanl&#228;ggningen med den h&#246;gsta effektt&#228;heten p&#229; marknaden!
