The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery ...

These containers can house batteries for storing excess energy generated from renewable sources such as solar or wind power. They provide a scalable and modular solution for grid ...

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best ...

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing solar power. In this guide, we'll explore the ...

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Containerized Battery Energy Storage System (CBESS) is an important support for future power grid development, which can effectively improve the stability, reliability, and power quality of ...

These systems consist of energy storage units housed in modular containers, typically the size of shipping containers, and are equipped with advanced battery technology, ...

Our Solarfold(TM) containers use Lithium Iron Phosphate (LiFePO₄) batteries, which offer superior safety, longer lifespan (3000+ cycles), and better performance in extreme temperatures ...
