Where should a solar room be located?

If an east-facing solar room seems to be a good solution to either site or building problems, locate spaces such as kitchens on the east side of the house next to or behind the solar room to take advantage of the morning light and heat.

Can a solar room be used as a living space?

The solar room can be readily used as an expanded living space. You can build your house compactly and the solar room will provide a feeling of large exterior wall and window area. Growing Plants; some things to remember An important function of some solar rooms is the growing of food-and flowers.

What is an example of a solar room?

Examples of solar rooms include greenhouses, solariums, and sun porches. Greenhouses are the most common solar rooms. Conventional greenhouses, however, are not designed to take maximum advantage of the sun's energy.

How much heat does a solar room provide?

Most of the information in this chapter is applicable for relatively small solar rooms of 100 to 200 square feet. Unless your house is super insulated or in a mild climate, a solar room of this size will provide less than 25 percent of your heat. For big leaky houses, small solar rooms will provide as little as 5 or 10 percent of the heat.
