-----

The demand for solar photovoltaic glass in Italy is expected to continue to rise as more residential, commercial, and industrial facilities are investing in solar power systems.

The Gioia 22 is Italy's first nearly net-zero building. Rising high above Milan, the 398-foot tower uses onsite renewable energy sources, including expansive photovoltaic ...

COIMA's decision to incorporate Onyx Solar's photovoltaic glass solutions aligns with its vision of creating eco-friendly, energy-efficient buildings that meet the demands of modern urban living.

In 2024, the Milan exhibition district completed the installation of Italy's largest photovoltaic plant, developed in collaboration with A2A and Fondazione Fiera Milano.

Designed by Pelli Clarke Pelli Architects, Gioia 22 is a 120-meter-tall landmark office building in Milan, Italy. Gioia 22 uses onsite renewable energy sources including 6,000 square meters of ...

Located in Milan's CityLife district, this mixed-use development incorporates advanced glass facade systems that not only define its aesthetic but also enhance its ...

The goal was to create a solar power system capable of supplying the large energy demands of the Fiera Milano exhibition complex. The plant's ...

Designed by Pelli Clarke Pelli Architects, Gioia 22 is a 120-meter-tall landmark office building in Milan, Italy. Gioia 22 uses ...

In 2024, the Milan exhibition district completed the installation of Italy's largest photovoltaic plant, developed in collaboration with A2A ...

During Milan Design Week 2025, BIG-Bjarke Ingels Group tops out CityWave, a 140-meter-long solar canopy in Milan's CityLife district--set to become one of the world's ...

The tower is made of steel, wood and glass. Unipol Tower will provide spaces for retail, a 270-seat auditorium, offices and a panoramic roof garden for public and cultural events.

The goal was to create a solar power system capable of supplying the large energy demands of the Fiera Milano exhibition complex. The plant's design and construction took several years, ...

COIMA's decision to incorporate Onyx Solar's photovoltaic glass solutions aligns with its vision of creating eco-friendly, energy-efficient buildings that ...

On Milan's Gioia 22, aesthetically mounted PV modules deliver 800 kWp, demonstrating how solar generation can be integrated into modern glass facades without compromising ...

The Gioia 22 is Italy's first nearly net-zero building. Rising high above Milan, the 398-foot tower uses onsite renewable energy sources, ...
