---

Working principle; When the discrepant temperature of the solar collector and water tank reaches the set value, the controller shall start the circulation pump automatically.

As a leading company in the bearing industry, we are committed to providing efficient, reliable and sustainable bearing solutions ...

The new GGB EP 15 engineered plastics solution was developed specifically for use in photovoltaic solar power generation facilities with tracking solar panels. The EP 15 material ...

Pressure systems use stored energy for mechanical work. Each of these steps is crucial in transforming solar energy into a usable form that can be utilized for pressure ...

Solar technology company Conergy uses igus® components in their new solar tracking system. Learn more about how iglide® and drylin® are used here.

Solar technology company Conergy uses igus® components in their new solar tracking system. Learn more about how iglide® and drylin® are ...

Pressure systems use stored energy for mechanical work. Each of these steps is crucial in transforming solar energy into a usable ...

To transform solar energy into a pressure-bearing type, several crucial steps must be undertaken including 1. Understanding the concept of solar energy conversion, 2. Selecting ...

To transform solar energy into a pressure-bearing type, several crucial steps must be undertaken including 1. Understanding the ...

In solar power plants, they can be used in the bearing supports of tracking systems, for example in the elevation axis. Our plain bearings are available as bushes and flanged bushes, as well ...

With ongoing advancements in bearing technology, renewable energy equipment can operate more sustainably and reliably, supporting the global shift towards clean power.

One thing all these solar applications have in common is a single-axis or double-axis tracking system that continuously aligns the reflectors with the course of the sun.

As a leading company in the bearing industry, we are committed to providing efficient, reliable and sustainable bearing solutions for solar power generation systems.
