Did you know that Canada is home to 196 major solar power projects and over 43,000 solar photovoltaic installations on commercial, ...

Find out where your province and city are ranked in terms of solar energy potential. With charts and maps you will easily be able to make comparisons across Canada.

Canada reached a cumulative installed PV capacity of 5.33 GWac by the end of 2023, marking a 23% increase over the previous year. Ontario and ...

Solar increased more than fortyfold, from 0.1 TWh to 4.9 TWh 3. Provinces such as Ontario and Alberta led this expansion. Biomass-fired electricity generation increased by 7% (from 8.3 ...

Solar-generated energy has grown fast in Canada over the past 30 years. Older technology once made it difficult to generate enough power in northern climates, but advances in efficiency and ...

Installing solar panels on the roofs of residential homes can supply half of Canada's home energy demands. An anticipated 3,000 MW will be commissioned by the end of 2022 and a similar ...

This web mapping application gives estimates of photovoltaic potential (in kWh/kWp) and of the mean daily global insolation (in MJ/m² and in ...

This web mapping application gives estimates of photovoltaic potential (in kWh/kWp) and of the mean daily global insolation (in MJ/m² and in kWh/m²) for any location in Canada on a 60 ...

Canada reached a cumulative installed PV capacity of 5.33 GWac by the end of 2023, marking a 23% increase over the previous year. Ontario and Alberta accounted for 57% and 35% of the ...

Recent research has shown that installing solar panels on just 1% of Canada's agricultural land could generate between a quarter and over a third of the country's total electricity needs.

While most of Canada's solar energy capacity does, indeed, exist in the form of full-fledged projects, the number of smaller, ...

While most of Canada's solar energy capacity does, indeed, exist in the form of full-fledged projects, the number of smaller, independent farms is growing. Today, almost 30% of ...

Did you know that Canada is home to 196 major solar power projects and over 43,000 solar photovoltaic installations on commercial, residential and industrial buildings in the ...

Canada's total wind, solar and storage installed capacity grew 46% in the past 5 years (2019-2024), including nearly 5 GW of new wind, 2 GW of ...

Canada's total wind, solar and storage installed capacity grew 46% in the past 5 years (2019-2024), including nearly 5 GW of new wind, 2 GW of new utility-scale solar, 600 MW of new on ...
