Do you need a permit to install solar panels?

Generally, local governments require a homeowner's solar installer/contractor to obtain a permit for rooftop panels before they can be installed. After the PV system is installed, a professional from the local government will inspect the new array to ensure all building, electrical, and safety codes have been followed.

What is the solar permitting guidebook?

This Guidebook is designed to help local governments and their permitting agencies improve permitting of small solar energy systems. It is also designed to help building owners and solar installers navigate permitting as efficiently as possible. Practices recommended in this Guidebook apply to permitting agencies of all sizes.

What happens if you install solar panels without a permit?

If you install solar panels without a permit, you may be fined and forced to remove your system. Although permits can increase your total project costs, they are a necessary expense as unpermitted installations may not qualify for the tax incentives and rebates that can reduce your total investment in solar.

Do Solar Contractors need a local permit enforcing agency?

Efficient permitting requires cooperation among local permitting staff and solar contractors. Many local enforcing agencies have provided informational training for agency staff and solar contractors to explain local requirements.
