---

Successful applicants will receive up to 85% of their civil works, storage systems, auxiliary equipment, and system costs for grid ...

The European Commission has approved a significant EUR700 million (approximately \$763 million) aid scheme to propel the deployment of large-scale energy storage across ...

Spain is processing 462 energy storage projects totaling 7.6 GW. See the hybrid vs standalone split, regional hotspots, and technical implications for delivery and O& M.

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will ...

The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the flexibility and resilience of the national power system while enabling ...

Following provisional results announced in late October, the final decision approves funding for 133 projects with a combined power capacity of nearly 2,400 MW and total energy ...

This initiative, coordinated by the Ministry for the Ecological Transition and the Demographic Challenge (MITECO), seeks to catalyze the deployment of between 2.5 GW and ...

The scheme, approved by the EU in March under its Temporary Crisis and Transition Framework (TCTF), is expected to ...

This grants them legal support equivalent to power generation facilities in land acquisition and permitting
