Is 5G the future of Telecommunications in Zimbabwe?

While Econet maintains its dominance in overall base station infrastructure, the focus on 5G expansion points towards a future with faster and more reliable internet services. The Q1 2025 POTRAZ report paints a dynamic picture of Zimbabwe's telecommunications sector.

Why are MNOs focusing on 5G expansion?

The report highlights a significant 53.33% increase in 5G base station deployments, underscoring MNOs' commitment to bringing next-generation connectivity to the country. While Econet maintains its dominance in overall base station infrastructure, the focus on 5G expansion points towards a future with faster and more reliable internet services.

What's happening in Zimbabwe's telecommunications sector in Q1 2025?

The Q1 2025 POTRAZ report paints a dynamic picture of Zimbabwe's telecommunications sector. While mobile and internet data consumption continues its upward trajectory, driven by evolving consumer habits and the proliferation of smartphones, the financial health of MNOs faces headwinds from declining revenues and rising costs.

Which digital platforms are the most reliant in Zimbabwe?

This exponential growth underscores the increasing reliance of Zimbabweans on digital platforms for communication, entertainment, and information. Econet led this charge with a 20.68% increase in data traffic, followed by NetOne with 5.23%. Telecel, however, again bucked the trend with an 18.26% decline in data traffic.

The second quarter of 2025 marked a decisive moment in Zimbabwe's connectivity journey, with the nation recording a total of 469 new base station deployments across 2G, 3G, ...
