Resetting the system places the system into shutdown mode but does not completely remove power from all components. For instructions to fully power cycle the system, see the How do I ...

If there is an error you should run a self-test to see if the error clears. If the error does not clear it is possible one of the batteries need to be replaced and you should contact ...

PWRcell battery errors come in different forms and meanings. They can be as simple as one-time errors that resolve with a single reset, installation errors, or an overall system error that can recur.

Occasionally, after a reset it may show an error code of 7000 (which is generic simple code), with instructions to power cycle or power reset the system.

If the battery cabinet LED is flashing red rapidly, the system won't be able to charge the battery. To check if there is an error, PWRcell owners should refer to the main inverter screen.

If the Vertiv™ Liebert™ EXS battery cabinet is installed on a raised floor, the battery power cables and circuit breaker control cables may be routed to the UPS cabinet through the bottom ...

**Battery breaker status** The battery breaker status will switch from ON to OFF within three seconds after the software set time. Was this helpful?

**How To Troubleshoot a Battery Cabinet That Has Lost Communication** This article will dive into what troubleshooting customer support can provide when the battery has lost ...
