-----  
What happens if a ground crew doesn't communicate with a flight crew?

Without clear communication between ground crews and flight crews, this phenomenon could pose risks to ground vehicles or other nearby personnel. Similarly, improper coordination during ramp safety procedures can jeopardize the safety of everyone involved. Ground handling communication remains a cornerstone of safe and efficient airport operations.

What if there is a break in the radio guard?

Any aircraft in radio contact with the ATIS shall be informed that there will be a break in the radio guard. If practicable another ATIS or sector should be asked to listen out for, and to answer any calls during breaks in the radio guard.

What is lost communication between control tower and ARFF responders?

Lost Communications between Control Tower and Emergency Aircraft/ARFF Responders. Universal control tower light gun signals are transmitted to the aircraft (for clearance to land) and to the ARFF responders in the movement area on the airport (for clearance to cross active runways and taxiways).

How do ground crew and air traffic control synchronize?

Ground crew, air traffic control, and flight crew must synchronize their efforts to guarantee that the aircraft is ready for its next journey. Effective communication minimizes risks, optimizes efficiency, and ensures seamless ground operations.

Without clear communication between ground crews and flight crews, this phenomenon could pose risks to ground vehicles or other ...
