This article aims to provide a high-level analysis of the offshore wind market in Vietnam, including its potential for development and regulatory framework.

Offshore wind power and green hydrogen projects in Vietnam may soon benefit from unprecedented incentives, including fee ...

While solar dominates the conversation, Vietnam is also expanding its wind and hydro power capacity. The overall clean energy ...

While solar dominates the conversation, Vietnam is also expanding its wind and hydro power capacity. The overall clean energy sector is expected to maintain strong momentum.

While a 50-100 MW solar project can be developed in six months, transmission infrastructure requires two to three years to ...

While a 50-100 MW solar project can be developed in six months, transmission infrastructure requires two to three years to implement. This mismatch has created a ...

Until 2020, solar energy developed rapidly in Vietnam, but was later hindered by insufficient transmission infrastructure. The new targets imply significant expansion of both infrastructure ...

Vietnam has dramatically increased its wind and solar targets as it looks to up its energy production by 2030 to meet soaring demand, according to a revised version of its ...

The findings reveal that despite Vietnam's vast natural potential--such as hydropower, wind, solar, biomass,

and geothermal energy--several barriers hinder progress, including regulatory ...

These projects represent a significant boost to Vietnam's wind power capacity and contribute to the country's efforts to diversify its ...

Discover how renewable energy in Vietnam is transforming the nation's economy, grid, and regional power through policy, offshore wind, and solar innovation.

Offshore wind power and green hydrogen projects in Vietnam may soon benefit from unprecedented incentives, including fee exemptions, guaranteed electricity volumes, and ...

By 2023, renewable energy, including solar and wind, accounted for 27% of Vietnam's total installed capacity, making it the ...

This article aims to provide a high-level analysis of the offshore wind market in Vietnam, including its potential for development ...

By 2023, renewable energy, including solar and wind, accounted for 27% of Vietnam's total installed capacity, making it the country's third-largest power source.

Until 2020, solar energy developed rapidly in Vietnam, but was later hindered by insufficient transmission infrastructure. The new targets imply ...
