Does Seafloat have a combined cycle power plant in Santo Domingo?

The combined cycle power plant has arrived in Santo Domingo. While floating power stations have been around since the mid-90s, reinventing them with today's efficient, low environmental impact technologies is a first. SeaFloat does just that. And it's proving very popular.

Are floating power plants a resurgence in demand?

Hamed Hossain explains the recent resurgence in demand for floating power plants: "We are putting highly efficient combined cycle power plants on a barge. So far, these have only been on land. And we can include a battery on the barge as well, that's also new. In this way, we can always ensure maximum grid efficiency."

Are floating power stations a good idea?

While floating power stations have been around since the mid-90s, reinventing them with today's efficient, low environmental impact technologies is a first. SeaFloat does just that. And it's proving very popular.

Amongst them are Pecasa, a 50MW wind project financed with development banks and operated in cyclonic conditions, Matrisol, a 55MW solar project ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system ...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational ...

Amongst them are Pecasa, a 50MW wind project financed with development banks and operated in cyclonic conditions, Matrisol, a 55MW solar project with the first private offtake scheme in ...

What are the independent energy storage power stations in Santo Domingo
