How much does a solar inverter cost?

Our guide to solar inverter costs covers everything you need to know before purchasing your solar panel system. Below we'll cover: The cost of solar inverters varies from $\text{£}500-\text{£}2,000$ for the average property. The price depends on the type (string, micro or hybrid) you choose, the quality of the brand, as well as the size you need.

How much does a string inverter cost?

Most string inverters come with a 5- to 10-year warranty that can be extended for a premium. Considering most solar panels come with a 25-year warranty, it goes without saying that you will at some point have to replace your inverters. The average solar PV inverter replacement cost of a string inverter typically ranges from $\text{£}500$ to $\text{£}1500$.

How much does a microinverter cost?

Microinverters can cost from $\text{£}20$ to $\text{£}100$ a unit. It can cost around $\text{£}2,500$ for the average solar panel system comprising 14 panels, including installation costs like wiring. You'll face greater upfront costs when creating a system that uses microinverters, and the bill can be quite high if you're planning on a large installation.

Do you need to replace a solar PV inverter?

But like any other technology, solar PV systems require maintenance and sometimes replacement of their components. One of the most critical components of a solar PV system is the inverter. If your solar PV inverter is no longer working efficiently, you may need to replace it.

The price of a solar inverter can rely on factors such as the size of the system and the type of inverter chosen. To help you with the best idea of the ...
