Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

What is solar energy? Solar energy comes from the limitless power source that is the sun. It is a clean, inexpensive, renewable resource that can be harnessed virtually ...

Dinosaurs are a diverse group of reptiles that were the dominant terrestrial life form on Earth during the Mesozoic Era, about 245 million years ago. Dinosaurs went into ...

Non-bird dinosaurs lived between about 245 and 66 million years ago, in a time known as the Mesozoic Era. This was many millions of years before the first modern humans, Homo ...

Find solar panels at Lowe's today. Shop solar panels and a variety of electrical products online at Lowes .

The age of dinosaurs--also known as the Mesozoic Era--is divided into three periods: the Triassic, the Jurassic, and the Cretaceous. This stretch of time, from about 252 to ...

Explore the dinosaurs, marine animals, and other life from the Triassic, Jurassic, and Cretaceous periods.

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on ...

Dinosaurs mysteriously disappeared at the end of the Cretaceous Period, around 65 million years ago.

They first appeared during the Triassic period, between 243 and 233.23 million years ago (mya), although the

exact origin and timing of the evolution of dinosaurs is a subject of active research.

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

This era ended up introducing some of the most famous dinosaurs in the history of the dinosaur timeline. The most prominent examples were the Tyrannosaurus rex, Triceratops, ...

The Mesozoic Era is often referred to as the "Age of Dinosaurs," spanning a vast period in Earth's history. This era, lasting from about 252 million to 66 million years ago, ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

Solar technologies are categorized as either passive or active depending on the way they capture, convert and distribute sunlight and enable solar energy to be harnessed at different levels ...

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what ...
